

From idea to delivery

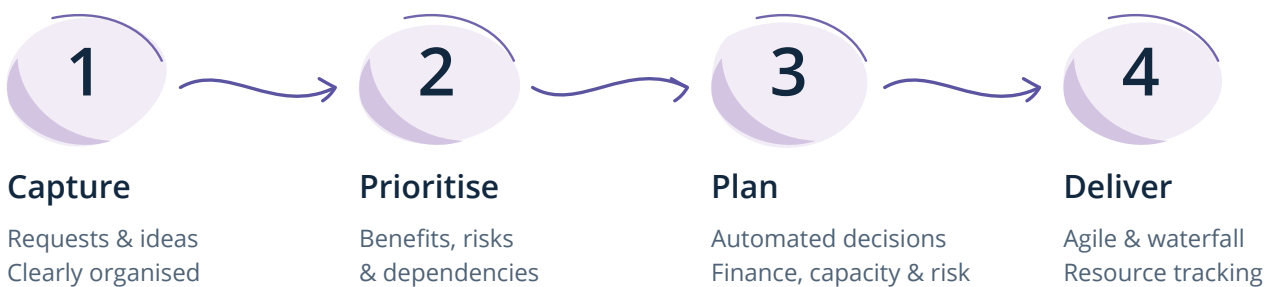

Proven practices and preconfigured processes help companies coordinate teams and finances to meet their current goals.

Turn priorities into achievable plans

Connect ideas and user requirements with delivery across agile and waterfall projects, including integrated resource management.

Capture requests, agree the scope and plan delivery around available capacity. Business stakeholders, managers and suppliers work from the same information.

FROM IDEA TO DELIVERY

THE ELLER ADVANTAGE

A fast, responsive app

A modern, AI-enabled interface with data governance for reliable AI processing and human oversight.

Save time every day

Keep requirements, project tasks and meeting minutes together. Reduce handovers and repeated administration.

Unlimited customisation

Adapt the data model, workflows, project lifecycles, views and permissions to the way your organisation works.

CONNECTED CAPABILITIES

- Requirements & embedded diagrams
- AI assistant & meeting minutes
- Agile, waterfall & resource planning
- Release planning & integrations

Plan your next project with Eller

Discuss your requirements and project management.

eller.com/demand-management

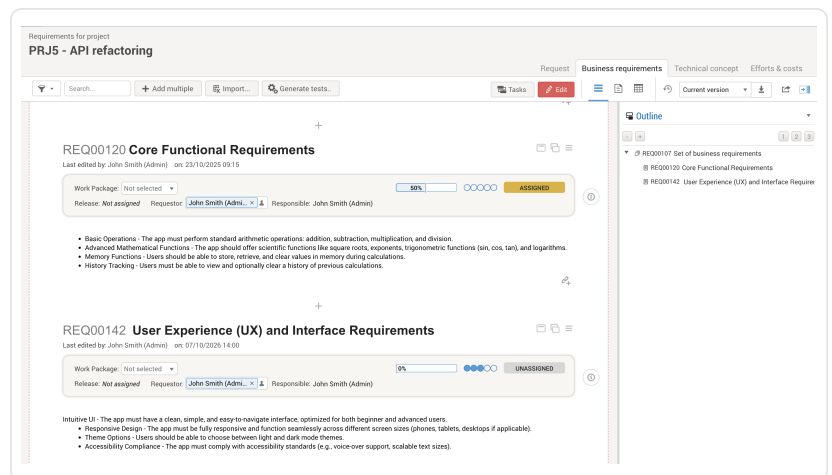

Clear scope. Coordinated work.

Build a shared understanding of the outcome. Connect plans to people, capacity and decisions that move delivery forward. Access history, audit trails, time analysis and impact analysis.

01 / REQUIREMENTS THAT STAY CONNECTED

Write, visualise and agree

Link tasks, issues and discussions to specific text in the collaborative requirements editor. Create diagrams directly inside requirements with the embedded diagram editor.

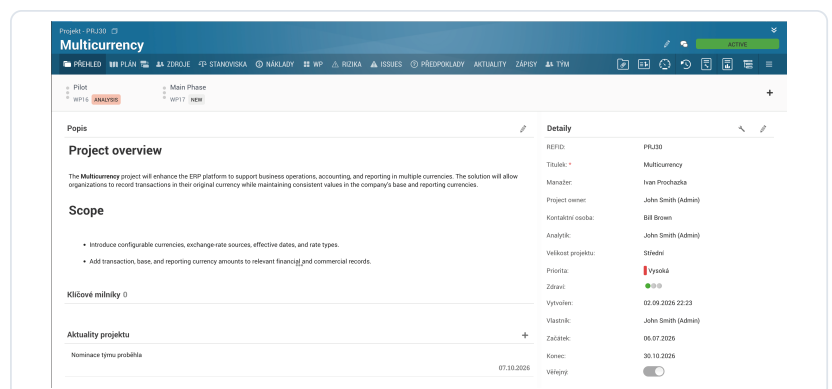

Requirements and their status.

02 / DELIVERY METHODS, SHARED CAPACITY

Plan delivery and capacity

Run Agile and classic waterfall projects with integrated resource management. Automate release planning around priorities, dependencies and team availability. Track delivery through Gantt and backlog views.

Project overview, scope and status.

AI assistance. Shared decisions.

Use an AI assistant with data governance and human control. Capture decisions and follow-up actions in the meeting minutes editor.
