

Every test. A clear result.

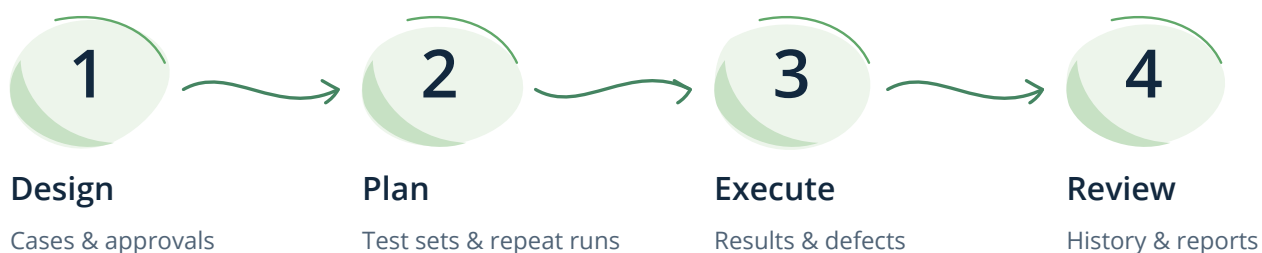

Connect test design, execution and evidence in one shared workspace.

Keep every test cycle under control.

Plan, execute and review testing in one shared workspace, with reusable test cases, clear ownership and integrated defect management.

Keep requirements, test steps, results and defects connected. Coordinate parallel test runs and see changes as they happen, from preparation through reporting.

FROM TEST DESIGN TO RESULTS

THE ELLER ADVANTAGE

A fast, responsive app

A modern, AI-enabled interface with data governance for reliable AI processing and human oversight.

Save time every day

Reuse test cases, coordinate handovers and share results instantly. Reduce repeated work across test cycles.

Unlimited customisation

Adapt workflows, defect lifecycles, approvals, fields and permissions to how your teams work.

CONNECTED CAPABILITIES

- Requirements traceability
- Roles, permissions & approvals
- Jira & external APIs
- Version history & live reports

Connect your testing with Eller
Discuss your testing and quality management.

sales@eller.com
eller.com/test-management

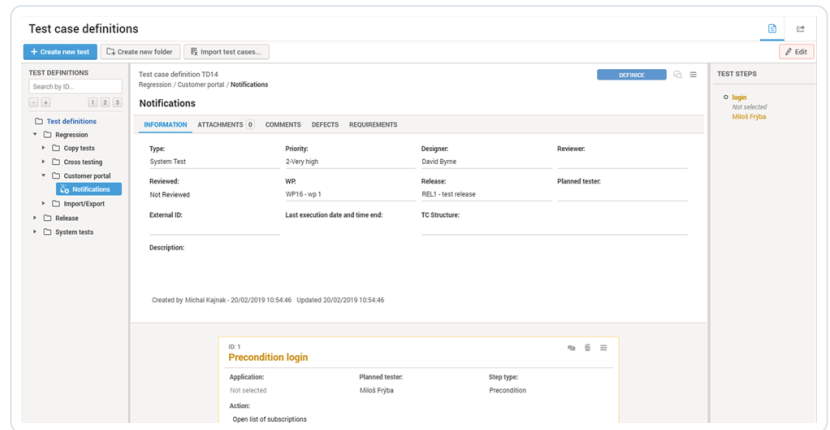

Connect the entire testing process.

Give test leads, testers and developers a shared view of cases, runs and defects.
Keep results and change history available for review and reporting.

01 / REUSABLE DEFINITIONS AND COORDINATED PLANNING

Build a shared test library

Organise definitions and steps in a shared, multi-project catalogue. Edit and discuss cases together, route changes for approval, then add cases to test sets for repeat runs.

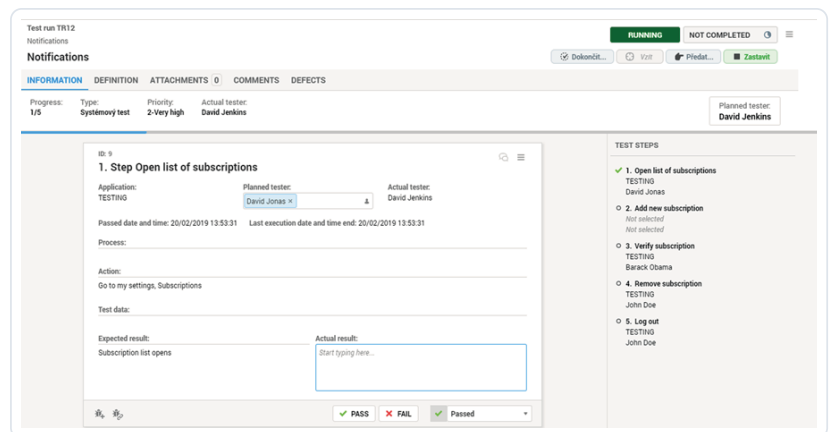

Test cases and their steps.

02 / COLLABORATIVE EXECUTION AND LINKED DEFECTS

Act on results as they arrive

Assign steps and hand tests between people, or work in parallel with live results. Record outcomes and linked defects. Review activity history, compare versions and track progress in reports.

Test execution and results.

Connect manual and automated testing.

Run manual tests and import results and defects from external automation tools through APIs.
Link quality work to requirements and projects across the Eller platform.

Connect your testing with Eller
